

CHECKMARC

Signature Service

CHECKMARCUSA offers solutions that make accepting checks as safe as cash. Signature Service is a bundle providing proactive check verification to weed out bad checks at the point of purchase, and reactive recovery services for any dishonored items that slip through verification.

Additionally, our exclusive Signature Service with Web-based virtual terminal check verification improves cash flow, maximizes staff time and eliminates confrontational situations.

Benefits of Signature Service

- ✓ Web-based virtual terminals or counter scanners electronically search more than 280 million business and personal checking accounts. Approve or decline codes are provided within seconds at the point of sale before goods or services are released.
- ✓ If the transaction is approved, our experience has shown the check has a 99% chance of clearing or being recovered.
- ✓ Checks/ACH that slip through the verification process are immediately transferred to our free check recovery service, which includes electronic and traditional recovery methods. We deposit 100% of the face amount of recovered checks/ACHs into your account.
- ✓ No minimum verification swipe requirements or restrictions. An unlimited number of checks may be verified for one low monthly fee.

Signature Service is delivered at a very low cost per month and makes accepting checks as safe as cash.

Swipe fee: 15¢ per verified check

Virtual Terminal: \$35/month for first PC;
\$10/month for each additional PC

Counter Scanner: \$57/month for 1st scanner;
\$25/month for each additional scanner

Integrated POS software: Cost of programming plus \$10/month for each POS terminal
